

WT 06-150, 06-169, 96-86 and PS 06-229

Commissioner Jonathan Adelstein

Dear Commissioner Adelstein,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

ON A SIMILAR SUBJECT, I believe that TV and radio frequencies that are licensed should be auctioned off, with the money going to fund public service groups that have nothing to do with corporations but everything to do with the public good: like quality news programs that are well-funded and totally free from economic interests! Most TV stations should be required to make significant time available to these services, even during prime time. This is a part of their (wildly lucrative for themselves) license deal. I recommend having Ralph Nader make a proposal for this public service system....

Sincerely,
Bret Hughes
